Operations recommended for the end of life treatment

There are several steps to process the products at the end of life so as to recover components, materials or energy : Reuse → Separation for special treatment → Other dismantling → Shredding.

The components of the products that optimize the recycling performances are listed, identified and located hereunder.

Disassembly Instructions:

1. Remove electronic and other equipment from the rack per the manufacturers' instructions. '
2. Disassemble remaining rack components and place into the appropriate recycling waste stream.

Rack Enclosures and Accessories product range consist of the following typical parts: (1) Powder-coated, galvanized and plated steel components, (2) grounding wires, (3) miscellaneous small plastic and resin components (e.g., bumpers) and (4) miscellaneous hardware (fasteners).
