

Overview

The new HP UPS Network Module allows an HP Uninterruptible Power System (UPS) to be directly connected to the network for remote monitoring and management of either a single UPS, or two UPSs in a redundant configuration. The UPS Network Module works with the HP Power Protector clients and can be configured to send alert traps to HP Systems Insight Manager and other SNMP management programs or used as a standalone management system. This flexibility enables you to monitor and manage UPSs through the network. To facilitate day-to-day maintenance tasks, the embedded management software provides detailed system logs.

Models

HP UPS Network Module MINI-SLOT Kit

AF465A

Kit Contents

- Installation Guide
- Warranty Card
- Option Card
- RS-232 to RJ45 cable

Standard Features

HP UPS Network Module The HP UPS Network Module enables you to configure, monitor and manage power environments through comprehensive control of individual HP UPSs.

Access the management module:

- Remotely through a Web browser
- Locally through a terminal emulation program

The UPS Network Module can be configured to send alert traps to HP Systems Insight Manager and other SNMP management programs or used as a standalone management system. This flexibility enables you to monitor and manage the UPS through the network connector; the serial connector located on the front of the management module is only used for configuration. To facilitate day-to-day maintenance tasks, the firmware provides detailed system logs.

Use the management module firmware to:

- Customize alerts
 - Send email notification messages
 - Send SNMP traps
 - Monitor and manager UPSs
 - Manage independent UPS load segments to provide separate power control of connected equipment
 - Display text logs for analysis
-

Product Features

- Easy monitoring and management of UPS using web browser.
 - Remote monitoring and control of UPS and attached devices.
 - Real-time email alarm notification
 - Support for standard HP MIB
 - SSL data encryption and authentication
 - Monitors the status of the UPS
 - Manages a graceful shutdown of attached equipment during a utility power failure
 - Manages independent UPS load segments to provide separate power control of connected equipment
 - Prioritizes the timing of equipment shutdown and reboots connected equipment by load segment
 - Delays restart by load segment after a power outage to sequence the startup of system components
 - Shuts down and reboots the UPS and attached equipment, based on an user specified schedule
 - Sends customized email and broadcast notification messages and SNMP traps
 - Issues computer commands at power failure
 - Displays logs for analysis
 - Supports a redundant UPS configuration
 - Includes multi-language support
 - Supports network attached server communications
 - Supports a customizable Events script
-

Standard Features

Highlights

Use HP Systems Insight Manager to:

- Discover HP UPS Network Modules. As part of the discovery process, HP SIM can detect an installed HP UPS Management Card. The web interface for the discovered module can be launched from the HPSIM Servers Links tab.
 - Receive SNMP traps from the management module. The module can send event-based traps to HPSIM that include a URL in the trap. This functionality enables administrators to easily launch the web interface of the module in context. For example, if the management module detects an alarm condition, the module can send a trap to HP SIM with an attached hyperlink that routes users directly to the Overview screen for the attached UPS.
 - Conveniently launch the management module web interface from within HP SIM. Tools menu-Users can add a link to the web interface on the HP SIM Tools menu using a tools definition file.
 - Event-based trap-A URL is included in each trap to link directly from HP SIM to the Overview screen for the specific device for which the trap was sent.
-

Security

- Control functions on the UPS Network Module can only be accessed using an Administrator password, which should be kept properly secured.
 - Browsing to the UPS Network module can be done using SSL, which encrypts the data between the browser and management module. The module is supported by a 128-bit encryption level. SSL also provides authentication of the management module by means of its digital certificate. Securely importing this certificate must be done to ensure the identification of the management module.

Service and Support

Service and Support

HP Technology Services

HP Technology Services offers you consultants and support experts to solve your most complex infrastructure problems. We help keep your business running, boost availability and avoid downtime.

Protect your business beyond warranty with HP Care Pack Services

When you buy HP Options, it's also a good time to think about what level of service you may need. HP Care Pack services provide total care and support expertise with committed response choices designed to meet your IT and business need.

Recommended HP Care Pack Services for optimal satisfaction with your HP product

Recommended Services

3-Year HP 24x7 4 hour Response, Hardware Support Onsite Service

Provides you with rapid remote support and if required an HP authorized representative who will arrive on site any time and day of the year to begin hardware maintenance service within 4 hours of the service request being logged.

Related HP Care Pack Services to enhance your HP product experience

Related Services

3-Year HP 6 hour Hardware Support Onsite Call-to-Repair Service

Provides an IT manager with a team of support specialists who will quickly begin troubleshooting the system to help return the hardware to operating condition within 6 hours of the initial service request to the HP Global Solution Center

<http://h20195.www2.hp.com/V2/GetPDF.aspx/5981-6636ENN>

HP Proactive Select Service

Provides a flexible way to purchase HP best-in-class consultancy and technical services. You can buy Proactive Select Service Credits when you purchase your hardware and then use the credits over the next 12 months. <http://h20195.www2.hp.com/V2/GetPDF.aspx/4AA2-3842ENN>

Insight Remote Support

Delivers secure remote monitoring and support for HP servers and storage, 24x7 at no additional cost. Available as part of HP Warranty, Care Pack and Service Contract offers.

Parts and materials

HP will provide HP-supported replacement parts and materials necessary to maintain the covered hardware product in operating condition, including parts and materials for available and recommended engineering improvements. Supplies and consumable parts will not be provided as part of this service; standard warranty terms and conditions apply. Parts and components that have exceeded their maximum supported lifetime and/or the maximum usage limitations as set forth in the manufacturer's operating manual or the technical product data sheet will not be provided, repaired or replaced as part of this service.

Service and Support

Coverage

For ProLiant servers and storage systems, this service covers HP-branded hardware options qualified for the server, purchased at the same time or afterward, internal to the enclosure, as well as external monitors up to 22" and tower UPS products; these items will be covered at the same service level and for the same coverage period as the server unless the maximum supported lifetime and/or the maximum usage limitation has been exceeded. Coverage of the UPS battery is not included; standard warranty terms and conditions apply.

The defective media retention service feature option applies only to Disk or eligible SSD/Flash Drives replaced by HP due to malfunction. It does not apply to any exchange of Disk or SSD/Flash Drives that have not failed. SSD/Flash Drives that are specified by HP as consumable parts and/or that have exceeded maximum supported lifetime and/or the maximum usage limit as set forth in the manufacturer's operating manual or the technical data sheet are not eligible for the defective media retention service feature option.

Storage Temperature	-4° to 140° F (-20° to 60° C)
Storage Relative Humidity (%)	5% to 95 % relative humidity non-condensing
Storage Elevation	0 to 49,000 ft (0 to 14935 m)

Environment-friendly Products and Approach

End-of-life Management and Recycling

Hewlett-Packard offers end-of-life HP product return, trade-in, and recycling programs in many geographic areas. For trade-in information, please go to: <http://www.hp.com/go/green>. To recycle your product, please go to: <http://www.hp.com/go/green> or contact your nearest HP sales office. Products returned to HP will be recycled, recovered or disposed of in a responsible manner.

The EU WEEE directive (2002/95/EC) requires manufacturers to provide treatment information for each product type for use by treatment facilities. This information (product disassembly instructions) is posted on the Hewlett Packard web site at: <http://www.hp.com/go/green>. These instructions may be used by recyclers and other WEEE treatment facilities as well as HP OEM customers who integrate and re-sell HP equipment.
